I bring to the table the skillset and experience to design and develop web based feature rich user friendly interfaces.

## Experience

**Front-End Web Developer** at [Filemobile](#)

**June 2011 - Present**

- My key role involves Product development, Maintenance and Design.
- In collaboration with the Product Manager and the Development Team, I work on improving the User Experience of the company's White-label web apps, Embeddable widgets and Media Factory platform modules.
- Communication with the project stakeholders helps me keep projects on track by flagging tasks that might delay delivery.
- Major projects in which I was the Lead developer include -
  - Designing and developing 3 of 4 of Filemobile's Highest selling Widgets: [Uploader, Slideshow and Gallery Widgets](#).
  - Developing and designing with the team - [Photo & Video Facebook canvas app](#)
  - Fully Designing and developing the Frontend of [Social Feeds \(Pull Instagram photos to the platform based on a hashtag\)](#)
  - Major UI revisions in [Media Factory](#) including the [Notification Center](#).
- Client projects I worked on with the team include Tim Hortons' [Everycup](#) Contest, World Bank's [Voices4Climate](#), [CBC Hyperlocal](#) among many others.
- Working on scheduled deadlines in an Agile project environment with prioritized tasks has been the methodology in use for most above mentioned projects.
- My duties also involve knowledge exchange with the junior developers, Tech support for clients and putting forth ideas for products on the roadmap.
- My Quick thinking and Problem solving abilities help me identify and implement the best solution for critical bugs.

## Web Developer at [CityMedia](#)

**March 2011 - June 2011**

- Worked closely with the CEO in designing and developing the company's product 'MarketPlace.'
- Most projects involved working on microsites for Newspaper based clients.
- Designed the company's promotional banners and ads along with print-ready material.

## Technical Skills

- Enjoy coding with HTML5, CSS3, Javascript, JQuery, SASS, Compass, AngularJS and Prototype JS with working knowledge of PHP, MySQL and OO Concepts.
- Highly skilled at coding client to server communications via GET, POST service calls and working with the response data formatted in JSON or XML or any other key-value object frameworks.
- Can design and create Responsive and Dynamic web experiences using Ajax, Bootstrap and JQuery UI.
- Able to debug any issues using Firebug and HTTP proxies like Charles.
- Well versed with the Facebook Javascript API, Janrain & Gigya Social Login APIs, Google Maps API and Instagram API end-points with capability to quickly grasp any new APIs if required.
- Years of experience using Adobe Photoshop and Illustrator to follow an iterative UX design process.
- Use GIT, SVN, Mac Terminal, Bugzilla and Basecamp on a daily basis and follow relevant projects on Github.

## Interpersonal Skills

- Very clear in communicating my concise observations on issues at hand.
- Love taking up challenging tasks and having the 'Every-problem-has-a-fix' attitude towards any bugs encountered.
- Always suggest my ideas to the Product or Back-end teams that can help improve our products or reduce Front-end coding time in any way.
- Break big projects into granular tasks and log accurate time estimates.
- Experienced in working with the QA team.

## Education

**Diploma in Multimedia Design & Production** at Fanshawe College

Sept 2009 - April 2011

**Bachelor's Degree in Information Technology Engineering** at University of Mumbai

Aug 2004 - May 2009
